

Weed Control Mats – Woven Polypropylene Introduction

1/3

Ideal for use as a weed suppressant at the base of newly planted trees, our woven polypropylene weed mats can help improve growing conditions without the need for chemical treatment.

Weed mats are essential to suppress weeds when you are unable to spray the base of the plants.

Our woven polypropylene weed mats have a typical lifespan of around five years, which is more than enough time for a tree to become established.

The woven material allows water to pass through, avoiding pooling, whilst supressing competition from weeds and grass around the base of the plant.

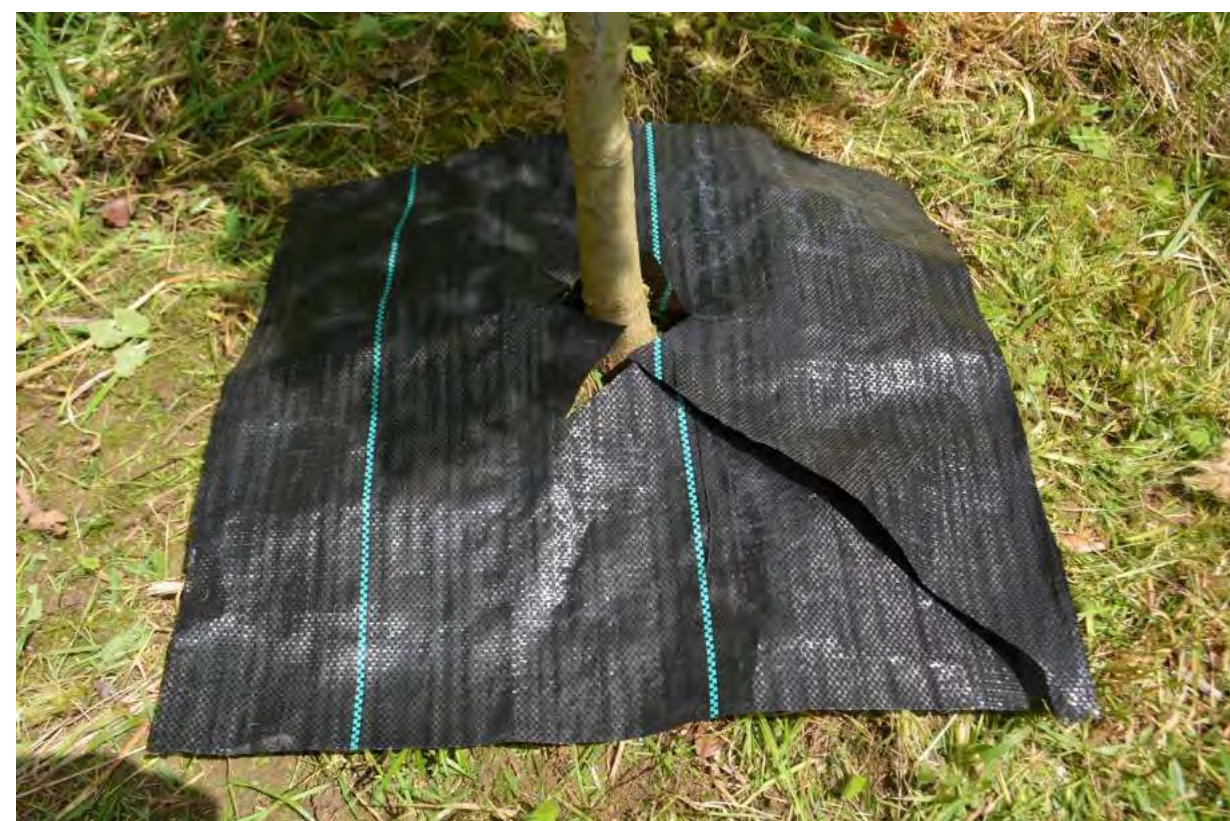

Available in two sizes, they are light and easy to install, and come with a pre-cut slit from the corner to the centre.

Benefits:

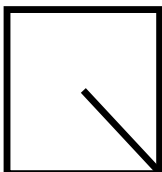

- Weed suppression without chemicals
- Water permeable
- Lightweight and easy to install

Installation:

- Prepare flattened ground by weeding or strimming prior to installation.
- Wrap around base of plant.
- Fix into position with metal pins.
- See installation diagrams (pg 2) for more information.
- At the end of its useful life remove the weed mat and pegs/pins for recycling.

Specifications:

Form	Mat	
Colour	Black	
Composition	Woven polypropylene	
Width	50cm	1m
Length	50cm	1m
Area covered	0.25m ²	1m ²
Split / spat		

Opaque	Yes
Water permeable	Yes
Bio degradable	No
Lifespan	5 years
Recyclable	General waste
	

Weed Control Mats – Woven Polypropylene Installation

2/3

Fig 1

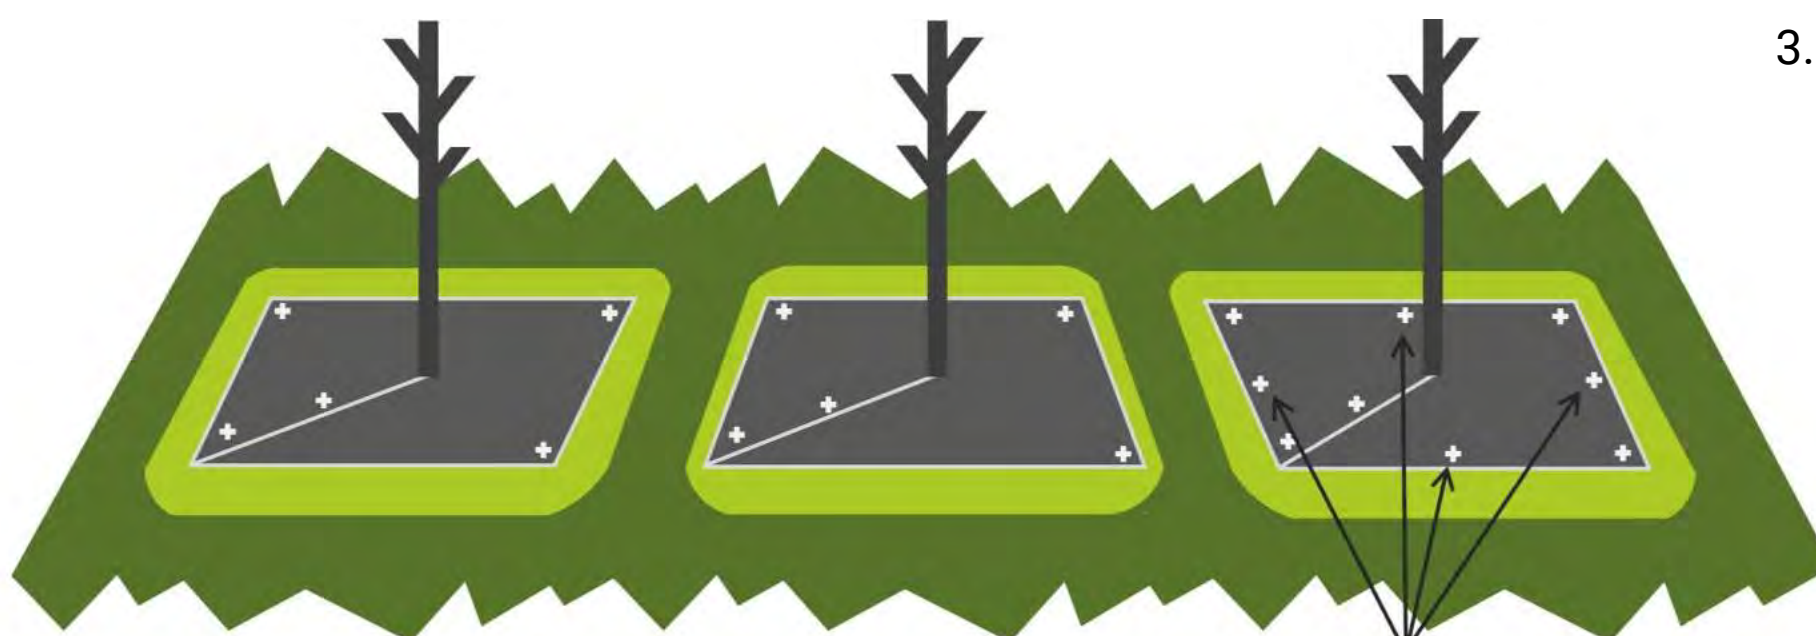

1. It is important to prepare the ground before laying your matting. Ideally weed the area and/or strim to create a flat surface (Fig 1).

Fig 2

2. Notch or pit plant your plant then wrap your mat around its base, ideally overlapping the edges slightly to avoid weeds breaking through (Fig 2).

Fig 3

3. Fix the mat in place with pegs or metal pins as indicated in Fig 3. For windier locations we recommend using extra pegs or pins (ie 9 vs 6).

If windy use extra pegs or pins to hold mat in place (9 vs 5).
